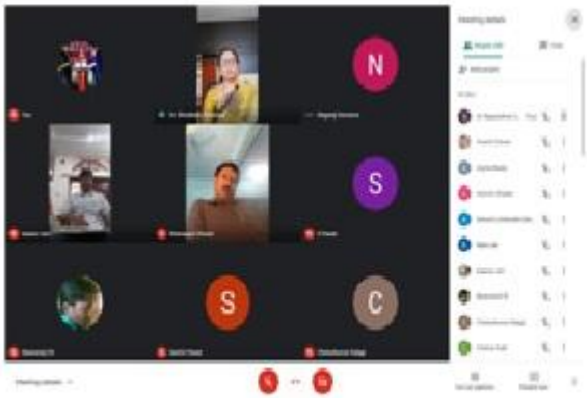
Course wise details of modes of teaching learning adopted during the academic year in each programme



Conserving Water At Home
Upgrade Your Appliances
Turn Off The Tap
For every minute that a faucet runs two gallons of water are used.
Water Your Lawn Right
Water during sunrise or sunset to avoid losing water to evaporation.
Cut Your Grass Effectively
Keep your grass height at 2 inches to give it shade and help it retain moisture.
Use Grey Water
Grey water is relatively clean, used water from your bathroom sinks, showers, washing machine, & other appliances. It can be reused to water plants and gardens.
Use your dishwasher wisely
New dishwasher models use less water than hand washing and clean more throughly let you skip a pre-wash!
Compost
Garage disposals use a lot of water and they also add a considerable amount of solids to your septic tank. Compost instead!
Check For Leaks
A faucet leaking at one drip per second can waste 3,000
Take Shorter Showers
Reuse and Re-wear
Save water on laundry loads by re-wearing lightly worn clothes
